Shooting Tragedy

Near Strathmore

Another fatal accident took place near Strathmore on Tuesday, this time on the farm of H. B. Brown, 15 miles north of here. The victim was a boy named B. C. Brinkley, who had been employed by Mr. Brown, and had been in the Strathmore district for several months. He had stated to Mr. Brown that he was going out to shoot a coyote he had seen prowling around, and that when he had last seen him was seen by him alive, when found he was lying dead, with a shot wound in his breast. Mr. T. H. Irvine, of the R.N.W.M.P., was sent for, and was soon on the spot. Dr. Givins came out next day and made a post mortem examination, which revealed that deceased had been killed by the accidental discharge of his gun. It was proven that the gun was not loaded when he left home, as he had not been to the side of the house, at least not as far as the kitchen, where he had been, as he had been at the time he was shot. The trigger had not been touched. The weapon was tested with blank cartridges, and it was found that with a moderate pull it would explode. This was immediately determined to be the cause of the fatal injury.

The boy was 16 years of age, and came from Terre Haute, Indiana.

Presbyterians to Build Church

On Monday evening a meeting of

members of Strathmore Presby-

terian Church was held in Lloyd's

Hall, when it was decided unani-

mously to take immediate steps

for the building of a church. Revs. Mr.

Ramsey and McLean, who were

present, were appointed to go to the

members and met with great

approval. The cost was esti-

mated to be about \$2000.

In the progress of the

work the building committee was ap-

pointed, with Dr. Givins as chair-

man, and a finance committee was

also appointed to take the raising

of the necessary funds.

There are a large number of Pres-

byterians in Strathmore and dis-

trict and the erection of a church will be

a great benefit to them.

DO NOT RENT.

"KING ALFALFA."BY PROFESSOR ELLIOT, SUPT.
C. P. R. DEMONSTRATION AND
SUPPLY FARM, STRATHMORE**SECOND ARTICLE****INOCULATION.**

Some time the art of getting a good stand of alfalfa may be due to the fact that the proper nitrogen gathering germs are not present in the soil. When this is the case, it may be successfully accomplished in two ways, viz:

By nitrogen, secured from some reliable source, or,

By securing earth from some field where alfalfa has been successfully grown, and scattering it where we expect to sow our alfalfa seed.

Both methods are good, although the latter is probably the easiest and handiest for the ordinary farmer.

A short description of each method may be given:

NITRO-CULTURE METHOD.

Generally, the nitro-culture is seen in fields in which manure containing the jellylike substance, in which the germs are growing, which is sufficient for the incubation of 60 lbs. of alfalfa seed. Take about one-half a pint of clean water in a suitable vessel, pour a little of the water into a bottle containing the jellylike substance, shake thoroughly, and pour back into the vessel.

This is the first time this several times.

Pour this liquid over the seed and mix thoroughly. Spread the seed out to dry. But keep out of the SUNSHINE. It will dry in a couple of hours, and should be planted in the usual way as soon as dry.

There are various methods of inoculating the seed that may be equally effective as the above, which is given in the Ontario Agricultural College.

The main thing is to follow the specific directions in each case. Of course, be sure that your information comes from a reliable source.

EARTH METHOD.

In using this method, secure from 100 lbs. to 200 lbs. of earth (the more the better) from some field where alfalfa is successfully growing and scatter it upon the ground.

The common way is to scatter this over the soil, so that the discing and harrowing will thoroughly mix the seed with the soil.

The earth should not be left lying on the top of the ground, but should be disc or harrowed in as soon as possible.

Many of the noted alfalfa sections of this continent had their starting point in the use of earth, and so we would advise everyone of the Bow Valley to use every precaution to have alfalfa started.

It is a precious truth that only needs to be known once, that when nitrogen gathering germs are established in the soil, there is no need for further inoculation. In fact after alfalfa has been grown successfully, we frequently find that it is not necessary to inoculate any further, for the germs are scattered to the rest of the field, through the irrigation ditches, seeping of manure, and in many other ways.

Have the first inoculation done properly and there is very little need for care after that.

SEED.

Be very careful to get the very best and cleanest seed possible. Fortunately, samples of seed may be sent to a Dominion Seed Branch in this Province, for free examination. This should test all farm seeds, from the food to the seed. There is another thing that needs to be guarded against. It may be that a farmer from Kansas or Colorado, who has had a splendid stand of alfalfa, may have some seed to sell. This seed will secure good for sowing in Alberta. He may have good success with this, but the farmer is indifferent, so much so, as to the fact that the seed has been moved too far North all at once. In other words, it is not adapted to its new environment.

As a rule, it is the safest plan to secure all seed, as long as it is clean and of good germination qualities, as near home as possible. This is, of course, a rule that needs to be followed until we are in a position to produce our own Bow Valley seed.

AMOUNT OF SEED PER ACRE.

This is a question that has received careful consideration from a great many experimenters, and the general opinion is, that when the crop is new, and farmers are just getting it introduced, a heavier seedling may be used than will be found necessary after the alfalfa is firmly established.

In the first year, we recommend twenty pounds of seed per acre. Later on, however, we may find that ten to fifteen pounds will be ample.

Sly-VickeryNUPTIALS CELEBRATED
IN CALGARY

A marriage which possessed much interest took place on Saturday at Calgary on Saturday, the bridegroom, Mr. Eugene Sly, having been engaged for some time past in farming operations here, along with Mr. Vickery, who as the result of their marriage becomes his father-in-law.

The bride's name is Miss Ethel Vickery, and the wedding took place in the city home of her father, Mr. Frank Vickery, of Weyburn. The officiating clergyman was Rev. Mr. Clark, of Knox Church. There were about 50 guests present, all of whom expressed their congratulations to the happy couple. Refreshments were served after the ceremony, and Rev. Mr. Clark proposed the health of the "Bride and Bridegroom," which was responded to by the bride.

The bride is a daughter of Mr. Sly and his bride left Calgary at 3 o'clock by motor to Cochrane, proceeding thence by train to Banff, at which place and Laggan were visited, and the honeymoon. A large number of handsome and costly presents were given the newly-wedded pair.

Mr. Sly was up until 1909 on the staff of the Western Canada College, but relinquished that position in order to take up farming at Strathmore with Mr. Vickery. They have a well-equipped farm of 120 acres, and a large number of horses and cattle.

Mr. Vickery has been a resident of the south road, Miss Vickery came from England about four years ago, having been brought to Alberta by her father, Mr. Vickery, who had been a member of the Royal Canadian Mounted Police.

Mr. Sly has been engaged in dry goods business since his arrival in the country.

The bride and her husband will be cordially extended to Mr. and Mrs. Sly, and success wished for them in their Strathmore home.

* His * Courtship.

By HELEN R. MARTIN,
Author of "Tillie: A Menanite Maid."

Copyright, 1907, by McClure, Phillips & Co.

(Continued.)

"As a general I kin stand a good hit. I don't care if I do. I don't care if there's certain er time I've to be fed near a week, with all the work layin'." Pop was as much for tellin' about it to ev'ry soul as he could, and he'd work me up so to hear him come over it all that I used to wish we didn't keep up with him. But I don't no comers and goers to tell it to."

She paused to take breath, but Kinns was ready with a question to urge her on.

"How do you know that it was not a case of suicide rather than murder?"

"The coroner, just reported Mrs. Morningstar. She didn't suspect no code of murder, but he was murdered in the first degree."

"It was the murdered woman who haunts the room?"

"I don't know," she answered, "but I know what I think. I don't believe 'em there. Once we've quit hotel and began furnishin' this here place, we slept in trainin' room in that there room, and above the top of a low shelf I plumb dinged into an examination of the books."

"There were the novels of Scott, Dicks, Dickens, Thackeray, George Eliot and Charlotte Bronte, the Tales of Poe, Macaulay's 'History of England,'

the 'House of Cards,' 'French Revol-

'the plays of Shakespeare, many of

the modern English and American

and Pope, the 'Canterbury Tales' and

Johnson's 'Lives of the British Poets.'

Taking down a volume at random,

she began to read, and, as she read,

she was in the winter of that there

room! Our Abe got afraid to sleep there?"

"Pete?" Dally turned eagerly to Kinnns. "You know I'm too busy to sleep in that room? If you're you'll tell us about the ghost, won't you?"

"I'll tell you if you'll tell me about the ghost."

"I'll tell you tomorrow morning," an-

sweared Kinnns. "Maybe I'll cut and run, but I'll tell you tomorrow morning and never can tell what you'll do when you're up against a ghost."

"Says?" Dally turned suddenly

exclaimed, her eyes moving from one

to another of her listeners with an

airly amounting in distress, "does it have to be?"

"Yes, it does," she said, "but I

haven't got any place else to go."

"And," thought Kinnns, "that her

father left a sum of his old

development, he recited the circums-

tion.

"Doesn't she ever ask questions

about herself?" inquired Dally.

"If I were she I wouldn't take me long to get asked."

"There for awhile she did," Mrs.

Morningstar said. "But we put her at it, and she'll think her parents let her have a wife."

"If the whole neighborhood knew of it I'd never see her again," he said from her.

He remained silent. "Surely some

one would be apt to tell her."

"We never let her go much. We keep her here," he said, "and just now she wouldn't hear nothing." He thought it

would be better to let her go.

"We never know she's been saving for her living while probably had been paid off," thought Kinnns.

"I don't know what's made me speak at all this time to her," Mrs. Morningstar said, "but I'm getting interested with her, and I'm in her favor and voice."

"I don't like to. But I

was born in a place where we was satis-

tin' for the dare to sleep in that

there room that the whole thing com-

es before I know right I was born."

It was a week later that Dally told

Eunice she was leaving.

Kinnns, who was watching the wo-

man intently, was sure that, judging

from her habitual treatment of Eunice,

her present intense apprehension

was certainly not due to the cause to be told. He was sure that the girl's passion for the girl. She was evi-

dently holding back now, which it

he could not comprehend.

"Perhaps," he reflected, "Eunice her-

self—contradictory and unaccountable

as she is in so many respects—knows

more about herself than any one sus-

pects."

He laid his hand on his heart.

"Investigate the house," he said, "and

the history of its history, to the

best of his knowledge, to get it, and he de-

termined that that very night should find him is set off to the

house."

Mrs. Morningstar was now summoned

to the room by Ollie's calling it

to "come lay over the dough."

"Graceless," cried Dally, making a

noise, and the ladyside, who had

parted reluctantly, "she's gone to lay

over the dough?" No more word for

me!"

CHAPTER XV.

THE O'LOCK THAT FOUND KINNS

hands, and soon after the family re-

heated he carried his kerosene lamp

down the long corridor which cut

the house in two from the front door.

He was relieved to find that the door

was not locked. Once across the

hall he could hear the sound of

the wind blowing in the

empty wall of the room. The last thing

he could have expected to find in the

middle of the house, far from the

front door, a bookcase filled with

books, a little library of classics, for

even across the width of the room he

could see the front door.

The bookcase, a slender, spindled

furniture in handsome old mahogany,

was not in any way noteworthy save

that there was something in its general

air of a slightly higher grade of people

than the Morningstars. It was nothing

so much as the appointments, to

suggest either a murder or a ghost.

True, he felt an atmosphere of uncanniness about the room, but he could

not account for it except on the theory

that the girl was a bit of a

ghost.

He carefully raised himself from his

steaming position and stepped out

against the wall.

The shock or fright of suddenly be-

holding a man in the room when she

supposedly was alone at midnight,

too—night actually injure her.

He yet must not longer leave

unwitnessed the room of his pres-

ence.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

He was about to turn and leave

the room when he heard a noise.

He turned to the door.

was bewildered. Something or suspi-

cion fairly jumped over each other in his brain. Whether she had learned

of his coming to this room and had

told him this place, whether she was

walking in her sleep, whether she was

waking him up, whether he had care-

fully closed the door behind him. Then, turning, he

realized that he had carefully closed

the door behind him. Then, turning, he

realized that he had carefully closed

ORANGE VALLEY.

At 3 p.m. each Sunday.

M. L. McLean.

Fourth Sunday of each month, at

3 p.m.

Mr. James H. Bury, Pastor.

IF You wish to succeed Advertise your Business in the "Bow Valley Standard." The increased custom will repay you more than double the cost of your Advertisement.

Mr. Samuelson of Illinois has joined her husband on their claim south of town.

Quite a little system of rural telephone is in operation, owned by Messrs. Alvestad, Samuelson, Fletcher and others are in the circuit and are utilizing the wire fence as the medium.

Dr. Wright was in Calgary on Tuesday

The Demonstration Farm

(Continued from page 4)

succulent berry. It is an inducement to other farmers in the neighborhood to see the progress that is being made in the growing of all kinds of fruit.

Miss Trench is busy in the poultry section with her many birds, and her efforts to improve the breeds are meeting with success. During the past few weeks she has sold several pure-bred hens to farmers in the district.

"Surratio."

(With apologies to Longfellow. Copyright in Canada and U.S.A. Music for "Surratio" to be used at all music dealers in Strathmore.)

The shades of night were falling fast, As the quiet Strathmore village post, As you were passing, you spied a crown ♫ very slender crest of down, Oh! Baby!

He was a little, he was a dim, As everybody looked at him, The tears were in his bright blue eyes, As you were passing, you spied a crown ♫ Oh! Baby!

To the door he went to dream, The road to the west he looked fine, The sun was winking at them a noise, A shout arose from all the boys,

A shout arose from all the boys, Who cut your hair?" one fellow said, He answered with a sigh "Twiss Red," The road that came was loud and long As you were passing, you spied a crown ♫ Oh! Baby!

Behave it will take long to grow, Another of hair, you know, And when you come to town, You'll have to pay for a wig, As you were passing, you spied a crown ♫ Oh! Baby!

But it's not easy to start the crop, And you've got nothing on the top, You'll have to go in for a wig, And you'll look fine in such a rig, As you were passing, you spied a crown ♫ Oh! Baby!

It's hard to start the crop, And you've got nothing on the top, You'll have to go in for a wig, And you'll look fine in such a rig, As you were passing, you spied a crown ♫ Oh! Baby!

It's hard to start the crop, And you've got nothing on the top, You'll have to go in for a wig, And you'll look fine in such a rig, As you were passing, you spied a crown ♫ Oh! Baby!

It's hard to start the crop, And you've got nothing on the top, You'll have to go in for a wig, And you'll look fine in such a rig, As you were passing, you spied a crown ♫ Oh! Baby!

It's hard to start the crop, And you've got nothing on the top, You'll have to go in for a wig, And you'll look fine in such a rig, As you were passing, you spied a crown ♫ Oh! Baby!

It's hard to start the crop, And you've got nothing on the top, You'll have to go in for a wig, And you'll look fine in such a rig, As you were passing, you spied a crown ♫ Oh! Baby!

it is the Finest Stock in the District.

LANGDON NOTES.

We notice that the C.P.R. have put a Y for turning engines and trains upon at Langdon junction. This is encouraging to the idea that we are to be the terminal of the railway line, the horses engine shed here. The teams used in the Langdon branch make very slow progress, necessarily so, until the road is firmly ballasted, but the rail road is firmly ballasted, so if in the future it will be as important a center to the main line as Calgary and Edmonton.

Mr. Fred Grosse of Oregon arrived on Monday with car load of turntable and effects. His house is now finished, the horses stable, Mr. Whisdon's Mrs. Grosse and family will be as soon as the houses in condition to accommodate them. The two older sons will remain, George, George, will attend his agricultural course, and the other his philosophical course, but will come to Langdon later on.

Messrs. Smith, Faulkner, and some other carpenters were up to Calgary on Tuesday to assist with the carpentry about the stable ordered there. The carpenters of Calgary are demanding 50c. an hour and 8 hours a day.

Mr. Crawford, representing the Imperial Guarantee and Accident Insurance company, was in town trying to establish a local agency last week.

Mr. J. N. Smart had a Case steam engine and machine plow come in on Tuesday and will immediately start breaking and planting flax.

Mr. Miller of Illinois, north of town, has his car of effects arrived on Tuesday.

Mr. Fletcher, of the Orange Valley, has a little house out of town, where they have resided with their youngest children. Mrs. Currys has been sick about three weeks, and was brought to town getting better when about a week ago she had a relapse, from which she never recovered. A husband, son, and nine daughters mourn the loss of a much loved member of the family.

Mr. J. McLean's building a new store in town.

Mr. Edwards is threshing flax for Mr. Oscar Miller.

We notice Charlie makes a trip to town every Sunday evening driving a great horse.

Mr. McLean's building a new store in town.

Seedling is well advanced in this district. A great many farmers are through, and others will soon be through.

Mrs. James Phillips is expected to return on or about the 7th of month.

if you need your Horse Shod or your Rig Repaired, or anything that a Good Blacksmith can do, call and see

Geo. H. Lloyd.

Next door east of King Edward Livery

King Edward Livery

Feed and Sale Stables

Good Horses, Rigs and Drivers

Special Attention given to Landseekers

Geo. H. Lloyd.

We are pleased to learn that the infant child of Mr. and Mrs. Silverthorn, which was born in very much better, and Mr. Silverthorn expects to come home with it the last of the week.

Wicker and Witwer are killing four cattle a week to meet the demand of the town only.

Settlers are coming in on every day.

An agent has been appointed at this point, as we are in telegraphic touch as well as railway touch with Langdon and Calgary.

A Wheeler has put in a Simpson weighing scale at a cost of \$165. Duncan McLean and wife returned from Toronto.

DALROY

Mrs. Bellamy, whose late husband bought a half section of land in Dalroy last summer and another half section this spring, arrived in Dalroy last Thursday evening.

Mr. Bellamy died just after loading a car of settlers effects for this point. The circumstances are not known, but said Mr. Bellamy had thought little of the wound, but blood poisoning set in and he died in less than a week.

We trust that Mr. Bellamy had given his wife the maximum of time to settle up her husband's affairs.

BUILDER AND CONTRACTOR.

Estimates cheerfully given on all kinds of buildings. If in need of any work do not fail to let me give you figures. First-class work done and Prices Right.

W. W. WHITFIELD,

Builder and Contractor, Namaka, Alta.

INVERLAKE

John Williams, a recent arrival from Bute, Montana, is building a new home on his quarter-section near here, and expects soon

John W. Hill, formerly of Hawarden, Iowa, has arrived with a car and office and is busy erecting a new home.

Max Miller and George Miers have gone on a landseaking trip to the Hand Hill district.

Spring is well advanced with the exception of flax, is finished in this district and most of the grain up.

Steps have been taken for the organization of a school district at Inverlake.

Mr. Galloway, formerly of the Roy Cowen store at Langdon, is now on duty as ditch rider for the C.P.R. Company here.

There will be enough acreage in the vicinity of Inverlake this year to warrant the erection of an elevator.
